

出力ドライバビリティ調整機能搭載でノイズを抑制

Output drivability adjustment function minimizes noise

Under Development

ROHM GROUP
LAPIS
SEMICONDUCTOR

車載品質対応、高信頼性レガシーSDRAMシリーズ

Automotive -Grade Legacy SDRAM Series

MSM56V16161N, MD56V62161M, MD56V72161C, MD56V82161A, ☆MD60Y1G160A, ☆MD60S1G160A

Features

■ 出力ドライバビリティ調整機能搭載でノイズ低減*

Built-in output drivability adjustment function suppresses noise
*SDR-SDRAM Series

■ 車載品質対応・銅リードフレーム採用*

Copper lead frame provides automotive-grade reliability
*TSOP package

■ 1Gb DDR3製品を新たにラインアップ

New line of 1Gb DDR3 products,
MD60Y1G160A (DDR3, 1.5V),
MD60S1G160A (DDR3L, 1.35V)
1Gb (64Mx16bit), 1600Mbps (800MHz), 96ball FBGA

Applications

■ カーCD、カーNAVIなどの車載関連機器

Car navigation and audio systems

■ 通信機器、業務用プリンタなどの産業機器

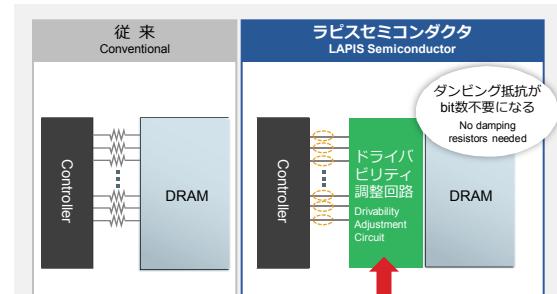

Industrial equipment (i.e. commercial printers and communication devices)

■ ドアホン、監視カメラ、AV機器類

Surveillance cameras, AV equipment, intercom systems

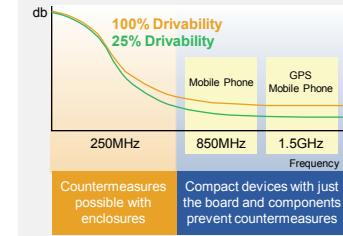

波形品質向上

Improved Waveform Quality

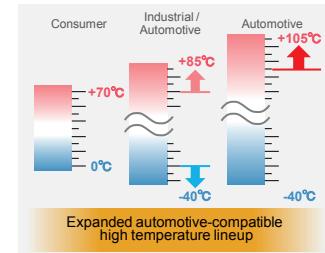

ノイズ低減

Reduced Noise

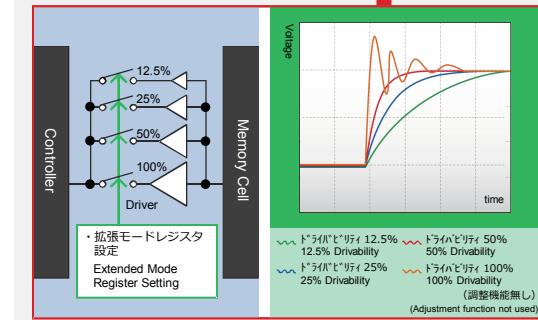

広範囲な温度保証

Wide Temperature Range

高信頼性&安定供給

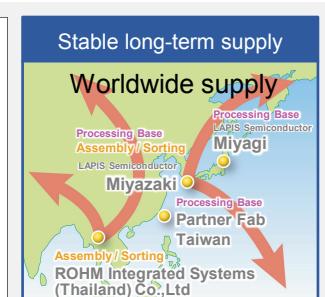

High Reliability and Stable Supply

Copper lead frame

Excellent conductivity
Cu

Copper lead frames are essential for maintaining the connection reliability required for automotive applications
