Notice of Revisions to Earnings Forecasts

ROHM has revised the forecast data announced on May 10, 2022 as indicated below to better reflect recent trends in its business results.

1. Revisions of Earnings Forecasts

(1) Revisions to forecast data of consolidated business results for the fiscal year ending March 31, 2023
 (From April 1, 2022 to March 31, 2023).

	Net sales	Operating profit	Ordinary profit	Profit attributable to owners of parent	Net income per share
Previously announced forecast (A)	(Millions of yen) 510,000	(Millions of yen) 76,000	(Millions of yen) 74,000	(Millions of yen) 60,000	Yen 611.38
Revised forecast (B)	520,000	90,000	105,000	80,000	815.15
Difference in amount (B-A)	10,000	14,000	31,000	20,000	—
Difference in percent (%)	2.0	18.4	41.9	33.3	—
(Reference) Results for the fiscal year ended March 31, 2022	452,124	71,479	82,551	66,827	680.62

(2) Factors for the revisions

The global economic outlook is likely to remain uncertain amid concerns over a possible global recession, primarily due to the fallout of Russia's invasion of Ukraine and persistently high inflation around the world. The electronics market will likely continue to see the further acceleration of energy saving to improve energy efficiency, more extensive use of electronic components, and increasing capital investments for factory automation and digitization around the world. That said, various downside risks will likely continue to cloud the outlook for the electronics market, including the risk of higher materials and other costs due to the effects of high energy and materials prices, geopolitical risks in the procurement of rare gases and rare metal materials that are essential for production, and the threat of a COVID-19 pandemic resurgence.

Given these circumstances, we will continue to supply products for power, analog and standard devices, where the ROHM Group excels, for the automotive electronics and industrial equipment markets, where mid- to long-term growth is expected, and will also continue to make every effort to ensure the establishment of a stable production system.

Under these circumstances, as we now forecast higher sales and profits than initially forecast for the fiscal year ending March 31, 2023, mainly due to the acceleration of industry-wide energy-saving efforts, the growth of the automotive electronics market and the greater-than-expected weakening of Japanese yen, we have decided to revise our consolidated full-year earnings forecast for the fiscal year ending March 31, 2023 as above:

In addition, the assumption of exchange rate in the second half of the year ending March 31, 2023 is 1.00 USD = 135JPY.

<Notabilia on forecast data>

Since the statement regarding the business results forecast accounted for in this press release is based on current information acquired by ROHM as well as specific legitimate prerequisites, actual business results may be considerably different due to various factors.
